MEMORANDUM FOR: THE RECORD

SUBJECT: Meeting with Assistant to the President
for National Security Affairs, 28 March 1985

[REDACTED]

2. The Director mentioned the apparent squeeze which the Soviets continue to put on us, not only the shooting incident of the military mission liaison officer (suggesting we ought to get some reaction out of this) but the Director also noted that the Soviets have been giving us a tough time for almost a year now on the air corridors and we don't seem to be doing much about it.

3. We briefed on the evolution of the Soviet ICBM capability and showed him the two charts describing the Soviet ICBM warheads and launchers in the 1990's versus 1985.

[REDACTED]

6. McFarlane asked as we parted (he had to leave early for a meeting) under what circumstances would the Soviets accept a 5,000 RV limit on their SLBMs and ICBMs. (DDI has been tasked.)

[REDACTED]

John N. McMahon
Deputy Director of Central Intelligence
